Subject Index

Abundance 255
Acarina 93
Acetobacter diazotrophicus 111
Acetylene 231
Acetylene blockage technique 24
Acetylene reduction assay 30, 190
Acid rain 151, 285
Actinomycetes 174
Added N interaction 57, 97
[^{14}C]Phosphinothricin 62
Aerated-steam disinfestation 174
Alkali soil 306
Allolobophora caliginosa 88
Amaranthaceae 140
Amelioration 261
Amidase 1
Ammonia fixation 145
Ammonia volatilization 43, 279
Ammonification 105
Amoebae 83
Animal manure 79
Antibiotic resistance 128
Antifungal activity 203
Aporrectodea longa 48
Arylsulphatase 18
Asparaginase 1, 6
Assimilation 234
Avocado 13

Bacillus circulans 210
Bark 105
Barley straw 101
Beech forest 151
Beech wood forest 255
Biocontrol 83
Biological containment 301
Biology 295
Bioturbation 285
Blue-green algae 306
Bradyrhizobium japonicum 121
Bradyrhizobium sp. (*Lotus*) 128
Bradyrhizobium spp. 30

C-bonded S 68
^{14}C-labelled beech leaf litter 151
Cadmium 34
Cajanus cajan 30
Calcareous soil 151
Calcium carbonate 306
Carbon 157
Carbon dioxide production 34
Carbon mineralization 221
Cast 48
Casts 24
Cd 18
Cell-killing function 301
Cellulolysis 105
Cellulose 75
Celosia argentea 174
Chloroform fumigation method 135
Clay-fixed NH_4^+ 145
CO_2 evolution 221
Cocoa 250
Cocoon production 295
Cognettia sphagnetorum 255
Collembola 93
Colony morphology 128
Cometabolism in soil 62
Compaction 48
Comparison 295
Compensation concentrations 38
Compost 105
Constitutive plant defence 203
Cr 18
Cu 18

Deamination 62
Decarboxylation 62
Decomposition 151, 221
Dehydrogenase activity 34, 181, 216
Denitrification 24, 116, 157
Denitrifiers 38
Disturbed sites 267
Dung 170
Dynamics of organic matter 234

Earthworm 48
Earthworm burrows 88
Earthworms 24, 170, 295
Ecological dose (ED_{50}) 18
Ecological dose range (EDR) 18
Ectomycorrhizae 75, 196
Eisenia andrei 295
Eisenia fetida 295
ELISA 121
Enchytraeidae 255
Endogonaceous 140
Endomycorrhiza 140
Energy flow 255
Enterobacteriaceae 210
Environmental effects 43
Enzyme kinetics 6
Enzyme-linked immunosorbent assay 121
Enzymes 261
Ethane 231
Ethylene 231
Evergreen conifer forests 267
Evergreen oak forests 267
Exopolysaccharide 30

Fertilization 261
Fertilizer N 57, 97
Flooded soil 116
Forest soil 245, 261

Genetic variability 273
Genetically engineered microorganisms 301
Geophagous tropical earthworm 234
Gliricidia sepium 273
Glomus agregatum 290
Glomus clarum 111
Glomus fasciculatum 290
Glomus mosseae 290
Glycine max 121
Green manure 221
Greengram 52
Gut load 170
Gypsum 306

H_2 oxidation kinetics 190
Hatching 295
Heat-treatment 174
Heavy metal toxicity 18
Herbicide degradation 62
Heterocyclic non-protein amino acid 203
Hexosamines 163
Hydriodic acid-reducible S 68
Hydrocarbons 231
Hysterangium setchellii 75

Immobilisation 157
Immobilization 101
Incubation 68
Inoculation 52
Invasion 181
Iodonitrotetrazolium chloride (INT) 216
Ipomoea batatas 111

Knallgas bacteria 190

Least-squares regression 239
Lignin 75
Lime 261
Litter bag experiment 163
Litter decomposition 93, 163, 285
Litter fragmentation 285
Litterbag 151
Logistic dose effect 18
Lumbricus castaneus 170
Lumbricus festivus 170

Macrofaunal effects 163
Maize 210
Mat communities 196
Mesenchytraeus glandulosus 255
Mesofauna 151
Methane 231
Microaggregates 83
Microbial activity 196, 216
Microbial biomass 75, 135, 181, 216, 245, 261
Microbial ecology 174
Microcosm 301
Microenvironment 75
Millsonia anomala 234
Mineralisation 157

^{15}N 57, 97, 116
N mineralization 6
N-15 methods 273
Nematodes 181
Ni 18
Nickel 34
Nitric oxide 38
Nitrification 105, 157, 231
Nitrifiers 38
Nitrogen 221, 279
Nitrogen cycle 196
Nitrogen fixation 210, 273, 306
Nitrogen mineralization 239
Nitrogen source 62
Nitrogen-15 145
Nitrosomas europaea 231
Nitrous oxide 38
Nodulation 30
Non-linear regression 239
Nutrient cycling 83
Nutrient dynamics 93, 163
Nutrient release 245
Nutrient uptake 250

Octolasium cyaneum 88
Oligochaeta 295
Organic amendment 97
Organic matter 306
Organic matter decomposition 245
Organic matter dynamics 135
Organic matter turnover 163
Organic matter-fixed NH_3 145
Organic N 1, 6
Oribatid mites 93
Oryza sativa 57, 97
Oryza sativa L. 116
Oxisol 250
Oxygen 228

Palm oil mill effluent 250
Particle size 221
Pasture 24
Pb 18
Phellinus weirii 245
Phosphatase activity 261
Phosphonate 13
Physical fractionation 234
Phytopathogenic fungi 203
Phytophthora cinnamomi 13
Phytophthora palmivora 13
Pigeonpea 30
Pisum sativum 203
Podzolic soils 135
Potential S mineralisation 68
Production biology 255
Protease activity 261
Protozoa 83, 181
Provenances 273
Pseudomonas 174
Pseudotsuga menziesii 75, 93

Rate determinants 24
Recolonization 181
Reduced tillage 135
Retention time 170
Rhizobium spp. 30
Rhizobium strains 273
Rhizosphere 13, 83, 140, 210
Richards model 239
Risk assessment 301
Root respiration 267
Root rot 13
Rotifers 181

S mineralisation 68
Saccharomyces cerevisiae 203
Saccharum spp. 111
Sawdust 105
Scale 239
Schinus molle 13
Scutellospora calospora 250
Seasonal pattern 267
Serology 121
Shannon index 121
Shape parameter 239
Sodic soil 306
Soil 181, 221
Soil bacteria 62
Soil carbohydrates 79
Soil enzymes 1, 6, 190, 279
Soil fauna 285
Soil microorganisms 13, 228
Soil N 57
Soil organic matter 79, 234
Soil particle-size fractions 79
Soil pollution 18
Soil reclamation 306
Soil respiration 34
Soil-mix microbiology 174
Soilless mix 174
Sorghum vulgare 111
Soybeans 121
Strain identification 128
Straw 221
Successive addition 34
Sugarcane 111
Suicide mechanism 301
Sweet potato 111
Sweet sorghum 111
Symbiosis 140

Theobroma cacao 250
Three-dimensional visualization 88
Total soil respiration 267
Tropical savannas 234
Tsuga mertensiana 245

Uptake hydrogenase (hup) 190
Uptake rate constants 38
Urea 101, 116, 279
Urea hydrolysis 43, 228
Urease 1
Urease inhibitor 101
Urease inhibitors 43
Urease production 228
Urine 279

VA mycorrhiza 290
Vesicular-arbuscular mycorrhiza 140
Vesicular-arbuscular mycorrhizae 52, 250
Vigna radiata 52

Water potential 48
Waterlogged conditions 43
Waterlogged soil 306
Wetland rice 57, 97, 116
Wheat cultivars 290

X-ray computed tomography 88

Zinc 34
Zn 18
Zn application 52
Zn uptake 52
